

December 2023 Quarterly Activities Report

31 January 2024

NORTH AMERICAN LITHIUM RAMP-UP PROGRESSES WITH PRODUCTION HIKE

Québec, Canada

Significant increase in ore mined at the NAL operation combined with higher grades delivered to the plant due to increased blasting efficiencies and dilution management.

Increased concentrate production by 9% to 34,237 dmt of spodumene concentrate at an average grade of 5.5% Li₂O. Record monthly production of 13,954 dmt achieved in December 2023.

Process plant utilisation improved with an average mill utilisation of 75%, an increase of 3% compared to the prior quarter.

Lithium recovery for the quarter was 62%, an increase of 4% compared to the prior quarter.

Two shipments of concentrate sold by NAL during the quarter. A third shipment departed port in early January 2024.

Major capital projects advanced at NAL, including the Crushed Ore Dome, together with substantially completing the Tailings Storage Facility 1. Additional major capital projects at NAL under review.

New high-grade lithium pegmatite mineralised zones identified at NAL in the north-west extensions to the mine and outside the current DFS pit shell, indicating potential for resource conversion and resource definition below the DFS pit shell.

Western Australia, Australia

77-hole aircore drilling program completed at Tabba Tabba, with 400 drill samples submitted to ALS Laboratories for lithium and multi-element analysis. Results anticipated to be returned first quarter of calendar 2024. Earthworks completed for a deeper RC drilling program at the northern drill area.

Corporate

Completion of strategic review and approval of five-pillar strategy.

Establishment of two Board committees, including a Nomination and Remuneration Committee and Audit and Risk Committee. Additional independent Non-Executive director to be appointed by the end of February 2024.

Management Commentary

It was a strong operational quarter for Sayona, with ore mined and concentrate production at NAL increasing compared to the prior quarter. NAL produced 34,237 dry metric tonnes (dmt) of concentrate at the target quality of 5.5% Li₂O, up 9% on the previous quarter, while major capital projects such as the Crushed Ore Dome were advanced.

The NAL team continues to explore options to optimise production processes, with initiatives to add new flotation instrumentation, additional monitoring of ore sorters and refinement of plant maintenance strategies well underway.

Exploration activity continued during the December quarter, with drilling at NAL and Vallée Lithium completed, providing the potential for further increases to the existing NAL lithium resource base. The first drill program in Western Australia at Tabba Tabba (lithium) was completed, with the results anticipated in the first quarter of calendar 2024. Earthworks have also been completed for a deeper RC drilling program, in a region which has been subject to some notable discoveries.

Post-quarter, Sayona announced on 25 January 2024 an operational review is underway to optimise NAL's cost structure in response to rapidly changing conditions in the global lithium market. The review is focusing on opportunities to reduce NAL's cost base, manage cash flow and preserve the operation's financial sustainability. The review is expected to be completed by the end of the first quarter of calendar 2024, with the outcome to be announced to the market.

Sayona is also continuing the process to recruit an additional independent Non-Executive Director, as part of our strengthening of corporate governance. The appointment is expected to be announced before the end of February 2024.

Amid challenging market conditions, Sayona remains focused on delivering results for shareholders and ensuring the Company is well positioned for the eventual upturn.

Mr James Brown
Executive Director & Interim CEO

KEY RESULTS AND ACTIVITIES

Safety and Sustainability

Health and Safety

The Total Recordable Injury Frequency Rate (TRIFR) increased in the December quarter due to a significant reduction in hours worked compared to the previous quarter, despite a decline in the number of incidents recorded in the quarter. The NAL mill achieved 90 days without a recordable injury. In December 2023, the lowest TRIFR was achieved since the restart of operations at North American Lithium, underscoring our dedication to continuous safety improvements and to foster a safer working environment.

During the quarter, the Company reviewed the work card across the NAL operation for standardisation, initiated a critical risks control program to be used in the training of employees and contractors on managing critical risks, and redesigned the toolbox meeting for improved communication across the NAL operation. It is anticipated these health and safety initiatives will be implemented in the upcoming quarter.

ESG and Community Engagement

During the quarter, NAL received permitting approval to operate the NAL concentrator at a feed rate of up to 4,500 tonnes per day. Additional permitting work progressed during the quarter related to the expansion of the NAL pit, overburden expansion and waste rock stockpile.

Sayona's ESG strategy was further refined during the quarter, which included the development of objectives and key performance indicators across the ESG priority areas identified in the company's Sustainable Development Policy. Gap analysis was performed to assist in the development of an action plan to achieve Towards Sustainable Mining certification, targeted for 2024.

The environmental assessment process continued for the Authier Lithium Project during the quarter. Key activities included the relaunch of several studies for finalisation as part of the broader impact study. Public consultations of the project notice were completed in November 2023, and feedback from the consultations provided to Sayona. Finalisation of the impact study is targeted in 2024, with BAPE (Bureau d'audiences publiques sur l'environnement) hearings possible as early as the end of 2024.

Engagement with local communities in the Abitibi-Temiscamingue Hub continued during the quarter, including a presentation by Sayona on the Definitive Feasibility Study for the NAL and Authier projects, as well as employment and contract opportunities within Sayona's Abitibi-Temiscamingue operations.

Negotiations continued with the Abitiwinni and Lac Simon communities with a view to reaching a mutually beneficial Impact and Benefit Agreement. Sayona met with the mayors of Chibougamau and Chapais during the quarter to discuss the opportunities for infrastructure within the territory, to support the operation of the Moblan Lithium Project. Regular quarterly meetings were also held with local families and tallymen, to discuss the best solutions for development of the Moblan Lithium Project in collaboration with local families and land users.

Operational and Financial Performance

Table 1: Summary of Key Metrics for Period Ended 31 December 2023

	Unit	Q2 FY24	Q1 FY24	QoQ Variance	YTD FY24	YTD FY23	YTD Variance

North American Lithium

Mining

Ore mined of 322,448 wet metric tonnes (wmt) was 44% higher than the previous quarter. Higher grades were delivered to the plant due to increased blasting efficiencies and dilution management.

NAL is actively preparing for the commencement of Phase 3 mining operations. This phase incorporates most of the underground stopes from the historical operations and is a significant component of the mine plan at the current NAL operation.

The Run of Mine (ROM) stockpile totalled 164,637 tonnes as at 31 December 2023, a 33% increase from 30 September 2023.

Production

The crushing circuit processed 268,472 tonnes of ore at an average feed grade of 1.17% Li₂O, an 8% increase in ore processed compared to the previous quarter. Improvements in feed grade resulted from grade increases of the various stockpiles used to feed the crushing circuit.

The process plant improved utilisation during the quarter with an average mill utilisation of 75%, an increase of 3% compared to the prior quarter. Utilisation improved despite challenges early in the quarter caused by weather, longer planned shutdowns and unplanned shutdowns. A significant increase in mill utilisation was recorded after the major planned shutdown in November for mill relining.

The Li₂O recovery for the quarter was 62%, an increase of 4% compared to the prior quarter. Recoveries improved due to an improvement in ore sorter availability from routine monitoring, along with an increase in mill recoveries from positive plant trials of the G3 collector and the retrofit of a high-density conditioning tank which had been decommissioned in the historical operation. Recoveries also benefitted from an increase in overall processing circuit stability.

During the quarter, NAL produced 34,237 dry metric tonnes of spodumene concentrate at an average grade of 5.5% Li₂O, an increase of 9% compared to the prior quarter. The rise in concentrate production was achieved by higher feed grade, improved plant utilisation following the planned shutdown in November, the addition of the retrofit high-density conditioning tank, and ongoing optimisation initiatives such as frequent changing of rods to prevent mill stoppages.

¹ All figures are reported in 100% terms. Numbers presented may not add up precisely to the totals provided due to rounding.

² Average realised selling price is calculated on an accruals basis and reported in \$/dmt sold, FOB Port of Québec.

³ Unit operating cost is calculated on an accruals basis and includes mining, processing, transport, port charges, site-based general and administration costs and cash based inventory movements, and excludes depreciation and amortisation charges, freight and royalties. It is reported in \$/dmt sold, FOB Port of Québec.

In December 2023, NAL achieved a record monthly production of 13,954 dry metric tonnes, a 14% increase on the previous monthly production record observed in June 2023. NAL achieved successive daily production records of spodumene concentrate production between 650 – 700 dry metric tonnes per day, reflecting the progress of process plant optimisation and continuous improvement programs. Additional flotation instrumentation upgrades are being explored to improve real-time optimisation of the flotation circuit, improve efficiencies and reduce reliance on operators.

Sales

Total concentrate sold during the quarter was 23,942 dry metric tonnes, a decrease of 50% on the prior quarter. Two shipments departed port during the quarter, with one cargo sold to the international lithium market and one cargo sold to Piedmont Lithium. The reduction in sales volume resulted from a smaller than average cargo sold to the international lithium market, and the delay of a third cargo leaving port until January 2024 caused by port congestion, holiday port closure and unfavourable weather conditions.

The average realised selling price (FOB) decreased by 52% to A\$946/dmt compared to the previous quarter. Lithium price indexes continued to decline during the quarter, leading to Quotational Period adjustments totalling A\$6.1 million (A\$254/dmt) which related to a prior quarter shipment. The estimated underlying average realised selling price achieved for the quarter (excluding Quotational Period adjustments) was approximately A\$1,200/dmt.

A total of 20,565 tonnes of spodumene concentrate was stockpiled at the port as at 31 December 2023.

Costs

Unit operating costs for NAL increased 14% to A\$1,397/dmt compared to the September quarter. The normalisation of non-recurring capitalised development costs from Q4 FY23 contributed to the increase in unit costs compared to the previous quarter.

Controllable costs increased due to additional workforce costs and replacement parts incurred for the major planned shutdown during the quarter, together with additional safety equipment hired to manage geotechnical risks around the mining of historical underground stopes.

Unit operating costs increased due to lower concentrate sold during the quarter, however this was offset by favourable inventory movements.

NAL Global Recovery and Mill Utilisation

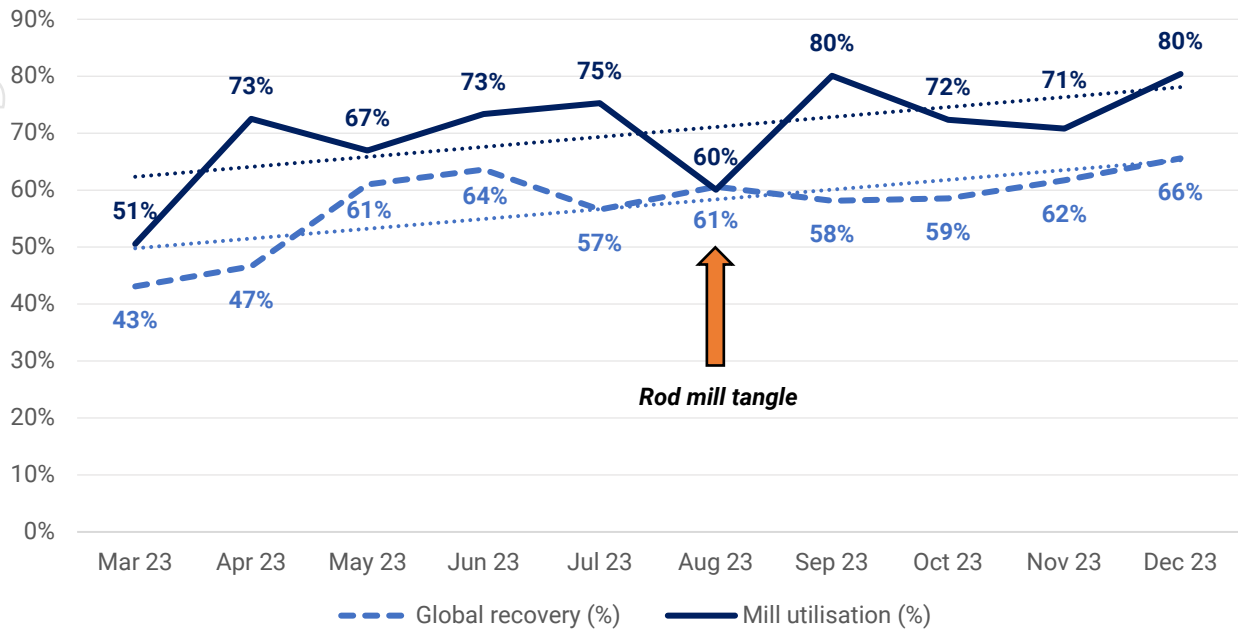

Figure 1: NAL Global Recovery and Mill Utilisation

NAL Concentrate Production

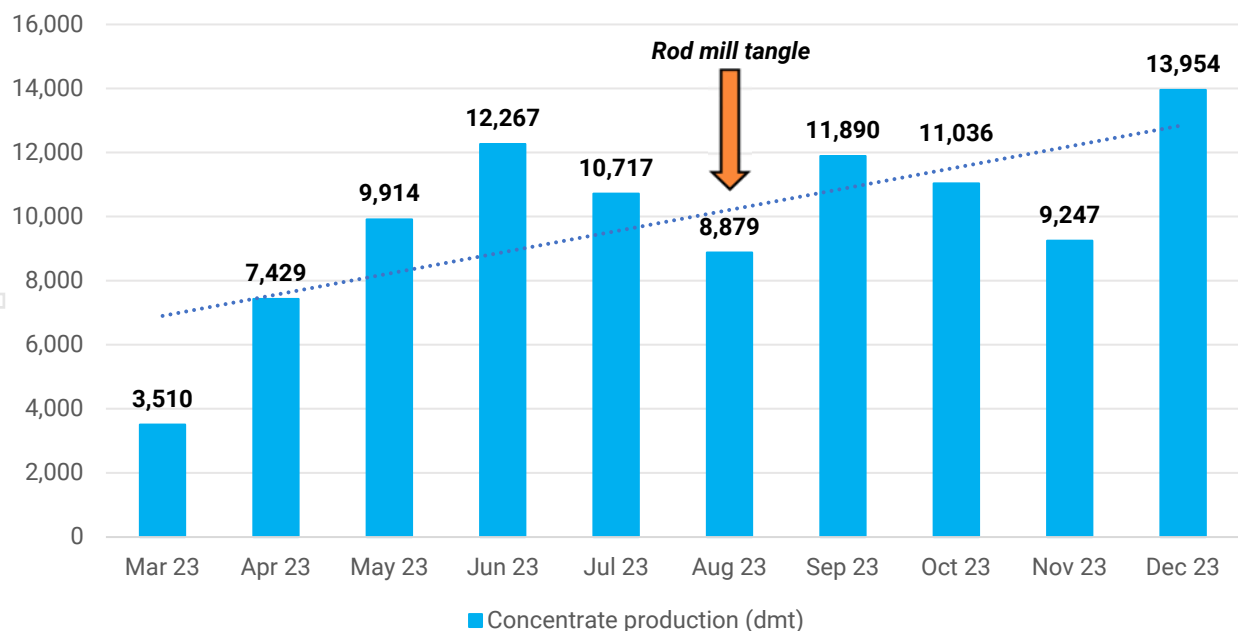

Figure 2: NAL Concentrate Production

Project Development

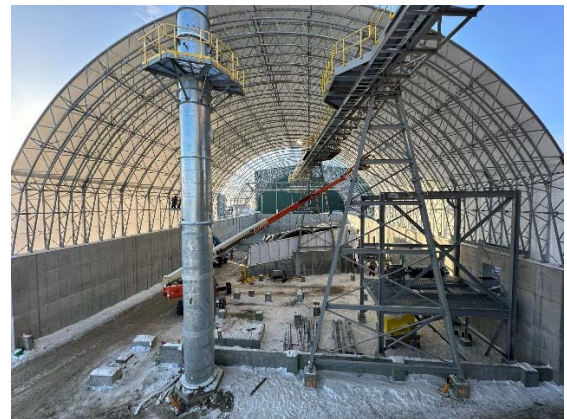

Québec, Canada

North American Lithium Crushed Ore Dome

The Crushed Ore Dome is designed to act as a secondary supply source of crushed ore to the mill to maintain process plant utilisation. The dome will have a storage capacity of around 6,000 tonnes of crushed ore when completed. All major equipment has been delivered to site, with the project expected to be completed by the end of March 2024.

The pouring of concrete walls and equipment foundations, together with all backfilling was completed during the quarter. Transfer towers are nearing completion, and the silo chute and bucket diverter were installed during the November planned shutdown which was a critical milestone. Most conveyors have been assembled and lifted in place, including the transfer conveyor, main conveyor as well as the belt feeder and reclaim conveyor. The dome arches were all erected during the quarter, with the fabric to be installed over the end walls in the following quarter.

NAL evaluated the addition of a refeed system, with the project being fast tracked into construction. The refeed system is anticipated to be completed by the end of March 2024 and will be considered as part of future production plans.

Figures 3 and 4: Crushed Ore Dome construction in progress

Tailings Storage Facility 1 (TSF1)

The existing Tailings Storage Facility 1 raise project aims to increase the tailings storage to approximately 1.9 million cubic metres of storage capacity to support process plant production. At the end of the quarter the project was close to completion with only minor works to be completed in 2024, including geomembrane installation and minor civil works on the north and south spillways.

Jaw Crusher C-150

The Jaw Crusher C-150 project is designed to stabilise mill throughput by minimising blockages in the crushing circuit and minimising use of the rock hammer on the ROM pad. The environmental approval permit was granted during the quarter, and all containers have been received at site. The project is being evaluated for completion in 2024 or 2025, to support ongoing cashflow management priorities.

Moblan Definitive Feasibility Study

The definitive feasibility study for the development of a lithium mine and concentrator at Moblan progressed during the quarter. Subject to the finalisation of workstreams by technical consultants and further partner reviews, the DFS is expected to be released in the first quarter of calendar 2024.

Exploration

Québec, Canada

North American Lithium

The objectives of the 2023 drilling program at NAL comprised the conversion of Inferred Resources to Measured and Indicated Resources within the current MRE pit shell, and exploration for extensions of the NAL spodumene pegmatite dykes to the north-west and south-east of the existing pit. The 2023 drilling program finished in November 2023.

New high-grade lithium pegmatite mineralised zones were identified¹ at NAL during the quarter in north-west extensions to the NAL mine and outside the current DFS pit shell. Lithium mineralisation inside the DFS pit shell continues to show continuity and consistency in grade and thickness, indicating the potential for resource conversion and resource definition within and below the DFS pit shell.

At 31 December 2023, a total of 172 diamond drill holes measuring a total depth of 45,535 metres had been drilled, with an average of five drill rigs used throughout the quarter. The drilling rate declined during the quarter, as the program progressed to completion in November 2023. A mineral resource upgrade is planned once all the drilling results have been received.

Vallée Lithium Project

The objective of the 2023 Vallée Lithium drill program was the exploration of the south-east extension of the Vallée Lithium deposit. At 31 December 2023, a total of 66 diamond drill holes measuring a total depth of 15,604 metres were completed, with an average of four drill rigs used throughout the quarter. The drilling rate declined during the quarter, as the program progressed to completion in November 2023. NAL fulfilled the first year option at Vallée Lithium resulting in the acquisition of 25% ownership of the Vallée Lithium project on 14 December 2023.

Moblan Lithium Project

The objective of the 2023 drilling program at the Moblan Lithium Project was exploration for extensions of the mineral resource, with a focus on lateral and depth delimitation of the known mineral resources. During the quarter, Sayona announced² drill results which showed Moblan's expansion potential. High-grade mineralisation was identified outside of the April 2023 JORC resource pit shell, indicating the potential to expand the existing resource.

Western Australia, Australia

Tabba Tabba Project

In December 2023 a 77-hole aircore drill program for 1,473m was completed. Drilling was focused on two areas along the 7.5km lithium prospective corridor within the lease, being the first drilling within the tenement to target lithium pegmatite mineralisation. Sayona holds a 100% interest in the rights to lithium and pegmatite metals within the lease under an agreement with tenement owners De Grey Mining.

The northern drill area, comprising two traverses spaced 400m apart was situated in an area where bedrock is obscured by thin cover and lies immediately south of the historic Tabba Tabba tantalum mine, where recent exploration by Wildcat Resources has identified encouraging lithium mineralisation. The southern drill area comprised four traverses over the Roadside and Turley pegmatite prospect areas.

In both drill areas bedrock is largely obscured by thin cover and the drilling was designed to provide geological and geochemical information to allow targeting of deeper drilling by reverse circulation and diamond drilling methods. A total of 400 drill samples have been submitted to ALS Laboratories for lithium and multi-element analysis, with results anticipated in the first quarter of calendar 2024. Geological data is currently being interpreted and when assay results become available, the combination of this information will help scope the next phases of drilling in the 2024 season.

¹ Refer ASX announcement on 2 November 2023

² Refer ASX announcement on 23 October 2023

As an interim measure, earthworks have been completed for a program of deeper RC drilling at the northern drill area, targeting favourable structures and host rocks, including the prospective gabbro-sediment contact for repetitions of Tabba Tabba style lithium pegmatite.

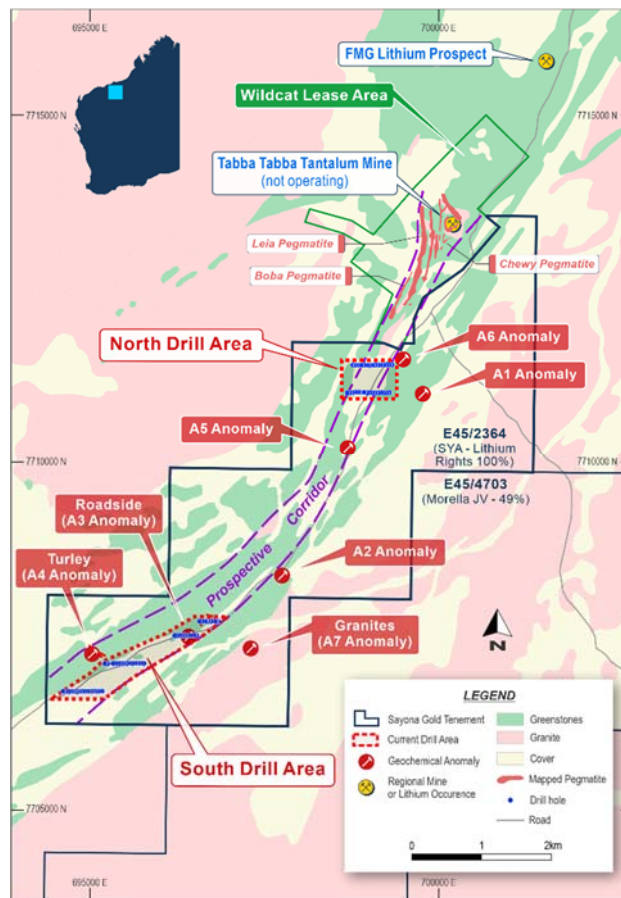

Figure 5: 2023 Drill holes at Tabba Tabba

Mt Dove Project

A drill contract was executed for first pass aircore drilling at Mt Dove. The timing for commencing drilling is currently being reviewed. The aircore drill program objectives are to test magnetic features and structural targets beneath cover for bedrock gold anomalism of similar style to De Grey Mining's nearby Hemi discovery.

Morella Lithium Joint Venture Project

Sayona holds a 49% equity stake in the Morella Lithium Joint Venture, which comprises lithium rights to six tenements in the Pilbara covering 426 square kilometres and two tenements in South Murchison covering 48 square kilometres. Morella Corporation Limited (ASX: 1MC) is the manager of the joint venture.

A total of 66 RC drillholes for 3,754m were completed at the Eastern Pegmatite 2 prospect within the Mallina project. The drilling results have confirmed and improved the understanding of mineralisation previously identified within the Pegmatite 2 area, with 42 holes intersecting lithium mineralisation above 0.5% Li_2O ¹. The Pegmatite 2 area is host to a 1.5km long pegmatite swam with the latest drilling confirming pegmatite thicknesses up to 20 metres. Additional drilling is planned over extensions to the identified mineralisation as well as testing new targets within the greater Mallina lease.

Exploration over other Joint Venture areas included completion of soil geochemistry at the Tabba Tabba East and West Wodgina leases, targeting key exploration zones identified through remote geological mapping and geophysical surveys. Results provide encouragement for drill planning to test target areas within the lease areas.

¹ Refer ASX announcement (ASX:1MC) on 5 December 2023

Corporate

Strategic Review

In November 2023, the Sayona announced¹ the results of the review of its strategy to become a leading global supplier of high-quality lithium chemicals, supporting global decarbonisation efforts and the energy transition. The review encompassed all facets of the Company, including operations and downstream processing, recognising Sayona's ability to take advantage of the continued drive for locally supplied, battery-grade lithium chemicals in North America.

Following the completion of the strategic review, the Board approved a five-pillar strategy:

1. Optimise operations;
2. Expand resource base;
3. Develop assets;
4. Integrate downstream;
5. Explore strategic partnerships.

Board Committee Update

In December 2023, the Sayona Board announced² the establishment of two Board committees, including a Nomination and Remuneration Committee and an Audit and Risk Committee. The Board committed to appointing an additional independent Non-Executive Director to the Board by the end of February 2024. The independent Non-Executive Director is expected to join the Audit and Risk Committee once appointed.

Sayona is also committed to appointing an independent Chairman to the Board, to enable the Company to satisfy the ASX Corporate Governance Council's Corporate Governance Principles and Recommendations regarding Board composition.

Annual General Meeting

Sayona held its Annual General Meeting of shareholders on 30 November 2023 in Brisbane, Australia. The voting results are available via the ASX announcement released the same day.

Annual Report to shareholders

Sayona released its Annual Report to shareholders for fiscal 2023 on 31 October 2023. The Group's consolidated loss after income tax for the year ended 30 June 2023 was \$12.9 million (2022: \$73.8 million profit).

Cash Balance³

The balance of cash and cash equivalents at the end of the quarter was \$158.0 million, a \$74.8 million decrease over the equivalent balance of \$232.8 million at 30 September 2023.

Major cash inflows for the quarter included:

- net receipts from customers of \$48.3 million from the sale of spodumene concentrate, which included customer repayments of \$22.2 million for Quotational Period adjustments relating to a prior quarter shipment;
- proceeds of \$4.2 million from joint venture partners; and
- proceeds of \$2.4 million relating to interest income.

Major cash outflows for the quarter included:

- \$65.0 million on production expenditure, which included adverse working capital movements at NAL;
- \$38.1 million on capital expenditure relating to the acquisition of plant and equipment at the Québec lithium projects;
- \$12.7 million on administration, corporate and payroll costs across all projects in Canada and Australia; and
- \$10.3 million on exploration and evaluation expenditure mainly relating to the Québec lithium projects.

During the quarter, the Company made payments of \$0.3 million to related parties, representing remuneration for Executive Directors and Non-Executive Directors.

¹ Refer ASX announcement on 9 November 2023

² Refer ASX announcement on 5 December 2023

³ All financial information is unaudited and may be subject to change in the final audited financial statements.

Sayona Québec Joint Venture (SYQ)

During the quarter, SYQ had receipts from customers of \$48 million and payments of operating costs of \$66 million, resulting in a net cash outflow from operating activities of \$18 million. SYQ incurred capital expenditure of \$36 million and exploration expenditure of \$5 million, resulting in a net cash outflow from investing activities of \$41 million. Equity contributions from joint venture partners totalled \$17 million for the quarter. The net decrease in cash and cash equivalents for the SYQ joint venture was \$43 million.

Group

Outside of the SYQ joint venture, Sayona incurred payments of operating costs of \$11 million. Sayona (excluding SYQ) incurred capital expenditure of \$2 million and exploration expenditure of \$5 million, resulting in a net cash outflow from investing activities of \$7 million. Sayona made payments to the SYQ joint venture of \$12 million. Other net cash flows were an outflow of \$2 million. The net decrease in cash and cash equivalents for Sayona, excluding the SYQ joint venture, was \$32 million.

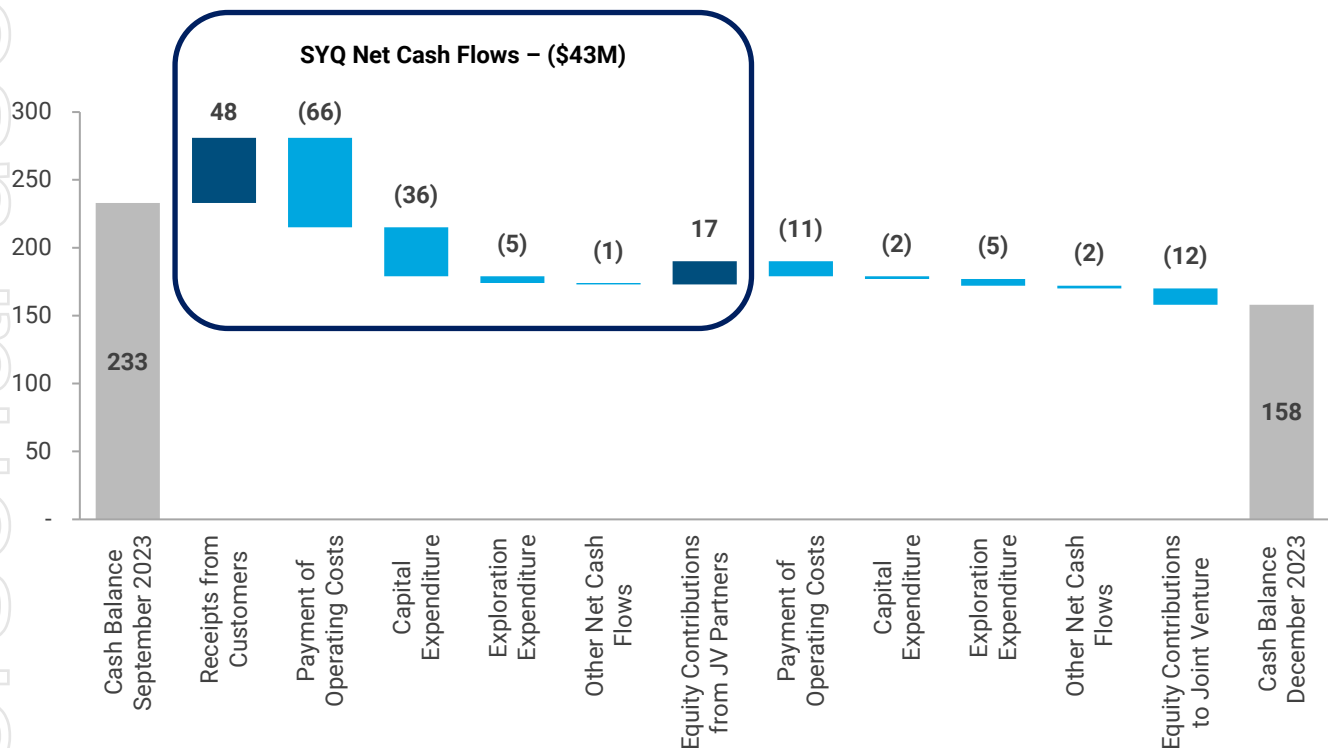

Figure 6: Sayona net cash flows for December quarter 2023

Capital Structure

At 31 December 2023, the Company had the following capital structure:

- 10,293,296,014 ordinary fully paid shares; and
- 12,234,482 unquoted options expiring on various dates.

About Sayona Mining

Sayona Mining Limited is a North American lithium producer (ASX: SYA; OTCQB: SYAXF) with projects in Québec, Canada and Western Australia, Australia.

In Québec, Sayona's assets include North American Lithium, the Authier Lithium Project and its emerging Tansim Lithium Project, which are supported by a strategic partnership with American lithium developer Piedmont Lithium Inc. (Nasdaq: PLL; ASX: PLL). Sayona also holds a 60% interest in the Moblan Lithium Project in northern Québec.

In Western Australia, Sayona holds a large tenement portfolio in the Pilbara region prospective for gold and lithium. The Company is exploring for Hemi-style gold targets in the world-class Pilbara region, while a portion of its key lithium projects are subject to a joint venture with Morella Corporation Limited (ASX: 1MC).

Note: if any amounts are shown in items 6.1 or 6.2, your quarterly activity report must include a description of, and an explanation for, such payments.		

Mining exploration entity or oil and gas exploration entity quarterly cash flow report

7.	Financing facilities <i>Note: the term "facility" includes all forms of financing arrangements available to the entity.</i> <i>Add notes as necessary for an understanding of the sources of finance available to the entity.</i>	Total facility amount at quarter end \$A'000	Amount drawn at quarter end \$A'000
7.1	Loan facilities	-	-
7.2	Credit standby arrangements	-	-
7.3	Other (please specify)	200,000	-
7.4	Total financing facilities	200,000	-
7.5	Unused financing facilities available at quarter end		193,550
7.6	Include in the box below a description of each facility above, including the lender, interest rate, maturity date and whether it is secured or unsecured. If any additional financing facilities have been entered into or are proposed to be entered into after quarter end, include a note providing details of those facilities as well. The Company entered into an At-the-Market Subscription Agreement (ATM) (previously referred to as a Controlled Placement Agreement (CPA)) with Acuity Capital on 29 October 2019. On 29 April 2021, the parties agreed to increase the ATM limit from \$3 million to a new limit of \$15 million and to extend the expiry date of the ATM to 31 July 2023. On 1 March 2022, the Company announced it had agreed to increase the ATM limit to a new limit of \$50 million. On 5 August 2022, the parties agreed to further increase the ATM limit to a new limit of \$200 million and to extend the expiry date of the ATM to 31 July 2025. To date, the Company has utilised the ATM to raise \$6.45 million. The remaining standby equity capital available under the ATM is \$193.55 million. The Company retains full control of all aspects of the placement process. There are no requirements on the Company to utilise the facility and it may terminate the Agreement at any time, without cost or penalty.		

8.	Estimated cash available for future operating activities	\$A'000
8.1	Net cash from / (used in) operating activities (item 1.9)	(26,609)
8.2	(Payments for exploration & evaluation classified as investing activities) (item 2.1(d))	(10,272)
8.3	Total relevant outgoings (item 8.1 + item 8.2)	(36,881)
8.4	Cash and cash equivalents at quarter end (item 4.6)	157,980
8.5	Unused finance facilities available at quarter end (item 7.5)	193,550
8.6	Total available funding (item 8.4 + item 8.5)	351,530
8.7	Estimated quarters of funding available (item 8.6 divided by item 8.3)	9.5
<i>Note: if the entity has reported positive relevant outgoings (ie a net cash inflow) in item 8.3, answer item 8.7 as "N/A". Otherwise, a figure for the estimated quarters of funding available must be included in item 8.7.</i>		
8.8	If item 8.7 is less than 2 quarters, please provide answers to the following questions: 8.8.1 Does the entity expect that it will continue to have the current level of net operating cash flows for the time being and, if not, why not? Answer: N/A	

Mining exploration entity or oil and gas exploration entity quarterly cash flow report

8.8.2 Has the entity taken any steps, or does it propose to take any steps, to raise further cash to fund its operations and, if so, what are those steps and how likely does it believe that they will be successful?

Answer: N/A

8.8.3 Does the entity expect to be able to continue its operations and to meet its business objectives and, if so, on what basis?

Answer: N/A

Note: where item 8.7 is less than 2 quarters, all of questions 8.8.1, 8.8.2 and 8.8.3 above must be answered.

Compliance statement

- 1 This statement has been prepared in accordance with accounting standards and policies which comply with Listing Rule 19.11A.
- 2 This statement gives a true and fair view of the matters disclosed.

(Name of body or officer authorising release – see note 4)

Notes

1. This quarterly cash flow report and the accompanying activity report provide a basis for informing the market about the entity's activities for the past quarter, how they have been financed and the effect this has had on its cash position. An entity that wishes to disclose additional information over and above the minimum required under the Listing Rules is encouraged to do so.
2. If this quarterly cash flow report has been prepared in accordance with Australian Accounting Standards, the definitions in, and provisions of, *AASB 6: Exploration for and Evaluation of Mineral Resources* and *AASB 107: Statement of Cash Flows* apply to this report. If this quarterly cash flow report has been prepared in accordance with other accounting standards agreed by ASX pursuant to Listing Rule 19.11A, the corresponding equivalent standards apply to this report.
3. Dividends received may be classified either as cash flows from operating activities or cash flows from investing activities, depending on the accounting policy of the entity.
4. If this report has been authorised for release to the market by your board of directors, you can insert here: "By the board". If it has been authorised for release to the market by a committee of your board of directors, you can insert here: "By the [name of board committee – eg Audit and Risk Committee]". If it has been authorised for release to the market by a disclosure committee, you can insert here: "By the Disclosure Committee".
5. If this report has been authorised for release to the market by your board of directors and you wish to hold yourself out as complying with recommendation 4.2 of the ASX Corporate Governance Council's *Corporate Governance Principles and Recommendations*, the board should have received a declaration from its CEO and CFO that, in their opinion, the financial records of the entity have been properly maintained, that this report complies with the appropriate accounting standards and gives a true and fair view of the cash flows of the entity, and that their opinion has been formed on the basis of a sound system of risk management and internal control which is operating effectively.
